Computer Care: Technical Worksheet

Grade 1 · Worksheet · About 25 minutes
Work with pen and paper. Use color pencils if you like. You do not need a computer or the internet.

Name: _____

Grade/Section: _____

Date: _____

How to use this worksheet

- Do the parts **in order** from top to bottom.
- Each part has a **time** so you know how long to spend.
- Read every instruction before you write. You can do this on your own.

Part 1 – What you will learn (about 3 minutes)

What you will learn: Computer care means keeping a computer clean, dry, and safe so it can keep working. In this worksheet you will name gentle ways to touch a computer, keep drinks away, and carry it carefully.

Do this:

1. **Have you used a computer or tablet at school?** Circle: Yes or No
2. **Name one thing** you already do to be careful with it.

_____

Part 2 – Gentle hands (about 5 minutes)

A computer has a **screen**, **keys**, and sometimes a **mouse**. Soft touches keep parts from breaking. Hard taps, poking the screen with a pencil, or slamming the lid can hurt the machine.

> **Real-life scenario:** Maya wants the screen to wake up. She taps lightly with one finger. Sam taps hard with a crayon. Maya's computer wakes up. Sam's screen gets a dark mark.

Discuss with a partner or reflect in writing: What is a gentle way to wake a screen?

Do this: Circle **Gentle** or **Not gentle**.

Action	Gentle or Not gentle?
Press keys softly	Gentle · Not gentle
Poke the screen with a pencil tip	Gentle · Not gentle
Close a laptop lid slowly	Gentle · Not gentle
Slam the lid shut	Gentle · Not gentle

Part 3 – Keep it dry (about 5 minutes)

Liquids (water, juice, milk) can go inside a computer and stop it from working. Keep drinks away from the keyboard and the screen.

> **Real-life scenario:** Leo brings a juice box to the computer table. He puts it next to the keyboard. When he reaches for a pencil, the juice tips over.

Critical thinking: Where should Leo put the juice instead? Write one place.

Do this: Write **Safe** or **Not safe**.

Where the drink is	Safe or Not safe?
On a side table away from the computer	_____
On top of the keyboard	_____
In a backpack across the room	_____

Part 4 – Carry with care (about 5 minutes)

When you move a laptop or tablet, use **two hands**. Walk slowly. Do not swing it or set it on the edge of a desk.

> **Real-life scenario:** The teacher asks Ana to bring a tablet to the reading corner. Ana holds it with both hands and walks. Ben carries one with one hand and runs.

Discuss with a partner or reflect in writing: Who is taking better care of the tablet? Why?

Do this:

1. **Circle** the safer way: Two hands and walk · One hand and run
2. **Write one sentence.** What could happen if a tablet falls?

   _____

Part 5 – Draw a care tip (about 5 minutes)

Do this:

1. **Draw a computer or tablet** being cared for. Show one care tip (gentle hands, no drinks, or two-hand carry).

2. **Write your tip** in a few words under your drawing.

Part 6 – Check what you learned (about 2 minutes)

Checklist. Put a ✓ in the box when it is true for you.

☐ I know **computer care** means keeping a computer safe so it can keep working.

☐ I can tell a **gentle** touch from a hard one.

☐ I know to keep **drinks** away from computers.

☐ I know to carry a laptop or tablet with **two hands**.

☐ I can draw or say one care tip.

When all boxes are checked, you have reviewed the main ideas from this worksheet.

Worksheet on Computer Care (Technical). Central topic: Computer care. Main technology area: Computers and device care.
