Safe Use: Technical Worksheet

Grade 3 · Worksheet · About 25 minutes
Work with pen and paper. Use color pencils if you like. You do not need a computer or the internet.

Name: _____

Grade/Section: _____

Date: _____

> **How to use this worksheet**
> - Do the parts **in order** from top to bottom.
> - Each part has a **time** so you know how long to spend.
> - Read every instruction before you write. You can do this on your own.

Part 1 – What you will learn (about 3 minutes)

What you will learn: Safe use means using a device in ways that protect you, your information, and the device. You will learn body position, password care, and what to click —or not click.

Do this:

1. **Name one device** you use at school or home.

   _____

2. **Circle** one safe-use idea you already know: Sit well · Keep passwords private · Ask before clicking

Part 2 – Sit and hold safely (about 5 minutes)

Your body needs care at a computer. Sit so your feet can rest. Keep the screen at a comfortable height. Hold tablets with both hands when you can. Do not eat or drink over the keyboard.

> **Real-life scenario:** Maya works with a laptop on the edge of a desk. Her juice cup sits next to the keys. When she reaches for her pencil, the cup tips toward the laptop.

Discuss with a partner or reflect in writing: What could Maya change to make this safer?

Do this: Write **Safe** or **Not safe**.

Action	Safe or Not safe?
Sit with the screen at eye level	
Rest a drink on the keyboard	
Carry a tablet with two hands	
Balance a laptop on a wobbly chair arm	

Part 3 – Protect your login (about 5 minutes)

A **password** (or PIN) is a secret key to your account. Do not share it. Do not write it on a sticky note stuck to the screen. Log out when you finish on a shared computer.

> **Real-life scenario:** Leo tells a friend his school password so they can "help" finish a game. Later, the friend logs in as Leo and changes Leo's avatar without asking.

Critical thinking: Why can sharing a password cause problems even with a friend?

Do this: Match each idea with a word from the word bank.

Word bank: *Private · Log out · Sticky note on screen · Trusted adult*

Idea	Best match
Keep your password this way	_____
Do this when you leave a shared computer	_____
A weak place to leave a password	_____
Who to ask if you forget a login	_____

Part 4 – Think before you click (about 5 minutes)

Pop-ups, strange links, and “free prize” buttons can be traps. **Safe use** means pausing. Ask a trusted adult if something looks odd. Stay on sites and apps your school or family allows.

> **Real-life scenario:** While reading a school page, a bright window jumps up: “You won a phone! Click NOW!” The address bar looks different from the school site.

Discuss with a partner or reflect in writing: What should you do first—click or ask for help?

Do this: Circle the safer choice.

Situation	Safer choice
A pop-up says you won a prize	Click · Ask an adult
You need a site for class work	Use the school list · Type a random site
A download appears without asking	Cancel / ask · Install it

Part 5 – Draw a safe-use checklist (about 5 minutes)

Do this:

1. **Draw yourself** using a device safely. Label three safe steps (sit well, private password, think before click).

2. **Write one sentence** about the step you will remember most.

Part 6 – Check what you learned (about 2 minutes)

Checklist. Put a ✓ in the box when it is true for you.

□ I can explain what **safe use** means for a device.

□ I know safe ways to **sit** and hold a device.

□ I know a **password** should stay private and I should log out.

□ I can pause and ask before clicking odd pop-ups or links.

□ I can show three safe-use steps in a drawing or list.

When all boxes are checked, you have reviewed the main ideas from this worksheet.

Worksheet on Safe Use (Technical). Central topic: Safe use. Main technology area: Device safety and secure habits.
