

How I Use Technology: Technical Worksheet

Grade 2 • Worksheet • About 25 minutes

Work with pen and paper. Use color pencils if you like. You do not need a computer or the internet.

Name: _____

Grade/Section: _____

Date: _____

How to use this worksheet

- Do the parts **in order** from top to bottom.
- Each part has a **time** so you know how long to spend.
- Read every instruction before you write. You can do this on your own.

Part 1 – What you will learn (about 3 minutes)

What you will learn: **Technology** means tools that use **electricity** or **batteries**—like a **tablet**, **TV**, **game console**, or **computer** at school. In this worksheet you will name technology you use, tell **where** and **when** you use it, and match each tool to the **job** it helps you do.

Do this:

1. **Name 2 technologies** you used today (e.g. TV, tablet, school computer).

2. **Circle** one: A pencil uses electricity — *Yes / No*.

Part 2 – Where I use technology (about 5 minutes)

You can find technology at **home**, at **school**, in a **car**, or in a **store**. Some things use electricity. Some things do not (like a bicycle or a regular book).

Real-life scenario: Sam uses a **tablet** for homework and a **TV** for a show after dinner. Both have screens, but they do different jobs.

Discuss with a partner or think: How is the **job** different even if both have screens?

Do this:

1. **Write Y** if it mostly **uses electricity** (or batteries), or **N** if it does **not**.

Thing	Y or N?
TV	_____
Bicycle	_____
Tablet	_____
Whiteboard at school (if it is electric)	_____

2. **Name one place** you use technology outside your home (e.g. school, car, store).

Part 3 – What I do with it (about 5 minutes)

People use technology to **watch**, **listen**, **learn**, **play**, or **talk** (like a video call). Each tool is best at some jobs.

Scenario: You want to hear a song quietly. Headphones help you **listen**. A TV might be too loud for others.

Critical thinking: Why might a **calculator** be a better choice than a tablet for quick math facts?

Do this:

1. **Match** each tool to its main job. Write the job word on the line.

Tool	Main job (watch / listen / learn / play / talk)
Headphones	_____
Video call on a tablet	_____
Math game on a computer	_____
TV cartoon	_____

Part 4 – My day with technology (about 5 minutes)

Your day has **morning**, **after school**, and **evening**. You might use different technology at different times.

Real-life scenario: Alex's family has a rule: **no tablets at dinner**. Alex can still use other things if the family allows them.

Discuss with a partner or think: What technology might Alex still use at dinner? (Think: lights, microwave, clock—not only screens.)

Do this:

1. **List or draw 3 times** in your day when you use technology (morning, after school, or evening).

2. **Circle** one: Thinking about *when* I use technology helps me *use it on purpose* / *not care when I use it*.

Part 5 – Right tool for the job (about 5 minutes)

The **same job** can sometimes be done with different tools. Pick the tool that fits the job best.

Real-life scenario: You want to **call Grandma** who lives far away. A phone or tablet with a video call can help you **talk** and see her face. A game console is not the best tool for that job.

Critical thinking: What could go wrong if you pick the **wrong** tool for a job? (Example: trying to read a long story on a tool made only for short games.)

Do this:

1. **Circle** the best tool for each job:

Job	Best tool (circle one)
Read a long story slowly, with pictures you can draw on	<i>Book / Game console</i>
Call a family member who lives far away	<i>Phone or tablet with video call / TV remote only</i>
Practice quick addition facts	<i>Calculator / Story book</i>

2. **Write one job** you did this week and the technology you used for it.

Job: _____ Technology: _____

Part 6 – Check what you learned (about 2 minutes)

Checklist. Put a ✓ in the box when it is true for you.

- ☐ I can name technology I use that needs electricity or batteries.
- ☐ I know technology can do different jobs (watch, listen, learn, play, talk).
- ☐ I can match a tool to a job it does well.
- ☐ I thought about when in my day I use technology.

When all boxes are checked, you have reviewed the main ideas from this worksheet.
