

Technology in My Day: Social Worksheet

Grade 3 • Worksheet • About 25 minutes

Work with pen and paper. Use color pencils if you like. You do not need a computer or the internet.

Name: _____
Grade/Section: _____
Date: _____

How to use this worksheet

- Do the parts **in order** from top to bottom.
- Each part has a **time** so you know how long to spend.
- Read every instruction before you write. You can do this on your own.

Part 1 – What you will learn (about 3 minutes)

What you will learn: Technology is part of daily life **with other people**—family, friends, and classmates. How we act matters: we share fairly, stay present, ask permission, and balance screen time with other activities. In this worksheet you will learn about **fair turns**, **being present**, **asking permission**, **healthy balance**, and **kind habits** when technology is around all day.

Do this:

1. **Did you share a device or screen with someone else today?** Circle: Yes or No
2. **Write one word** for how you want others to treat you when you use technology (e.g. fair, patient, kind).

Part 2 – Fair turns at home and school (about 5 minutes)

When tablets, TVs, or game consoles are shared, **taking turns** keeps things fair. A timer, a list on the fridge, or a teacher's plan can show whose turn it is. Keeping extra time or skipping someone's turn hurts trust.

Real-life scenario: Two siblings share one tablet. Each gets 15 minutes. When the timer beeps, one child keeps playing because "I am almost at the next level."

Discuss with a partner or reflect in writing: How does keeping extra time affect the other person? What is a fair way to handle "just one more minute" without breaking the agreement?

Do this: Write **two agreements** your family or class could use when sharing technology.

.

.

Part 3 – Being present with people (about 5 minutes)

Being present means giving attention to people near you—not only to a screen. When a parent, teacher, or friend speaks to you, it is respectful to **pause** your game or video and look up. Ignoring someone while you keep playing can feel hurtful.

Scenario: At dinner, a parent asks how your day was. You keep looking at a game on a tablet and do not answer until they ask again.

Critical thinking: What could you do instead that shows respect? Why can pausing for a minute matter more than winning one more level?

Do this: For each action, write **Kind** or **Not kind**.

Action	Kind or Not kind?
Pausing your show when a grown-up calls your name	_____
Watching someone else's screen without asking	_____
Putting headphones on so loud you cannot hear "time to stop"	_____

Part 4 – Permission and balance (about 5 minutes)

Use **permission** before you borrow someone else's phone, tablet, or account. Families and schools often have **rules** about screen time, homework first, and bedtime without screens. **Balance** means making time for play outside, reading, sports, and rest—not only screens.

Real-life scenario: A friend wants to play on your tablet right now. They say you do not need to ask a grown-up because "we do it all the time."

Discuss with a partner or reflect in writing: Why is asking a trusted adult important even if a friend says it is fine? What could go wrong if you share without permission?

Do this:

1. **Write one technology rule** at your home or school (e.g. screens off at 8 p.m., ask before downloading).

2. **Name one healthy activity** you enjoy that does not need a screen.

Part 5 – Kind habits all day long (about 5 minutes)

Kind habits with technology include: **sensible volume** in headphones, **asking before filming** or photographing others, and **telling a trusted adult** if something online feels scary or mean. The same polite words you use face to face belong in messages and games too.

Scenario: During recess, a classmate films you with their phone without asking. You feel uncomfortable and want them to stop.

Critical thinking: What are **two safe steps** you can take (e.g. say stop, walk away, tell an adult)?

Do this: Rewrite each message to be **kind and clear**.

Not helpful	Your kind version
"Give me the tablet NOW!!!"	_____
"Your game is dumb."	_____

Part 6 – Check what you learned (about 2 minutes)

Checklist. Put a ✓ in the box when it is true for you.

- ☐ I understand why fair turns and agreed time matter when technology is shared.
- ☐ I know how to be present and respectful when people talk to me while I use technology.
- ☐ I know to ask permission before using someone else's device or account.
- ☐ I can name a rule and a non-screen activity that help balance my day.
- ☐ I know kind habits: sensible volume, ask before filming, tell adults when something feels wrong.

When all boxes are checked, you have reviewed the main ideas from this worksheet.

Worksheet on Technology in My Day. Central topic: Technology in my day. Main technology area: Digital citizenship / Healthy habits.
