

Technology in My Day: Technical Worksheet

Grade 3 • Worksheet • About 25 minutes

Work with pen and paper. Use color pencils if you like. You do not need a computer or the internet.

Name: _____

Grade/Section: _____

Date: _____

How to use this worksheet

- Do the parts **in order** from top to bottom.
- Each part has a **time** so you know how long to spend.
- Read every instruction before you write. You can do this on your own.

Part 1 – What you will learn (about 3 minutes)

What you will learn: **Technology** means tools people design to help do jobs—not only screens. Technology can be in your morning, at school, and in the evening. In this worksheet you will notice technology across your day, name what technology **helps us do**, learn simple **input** and **output**, and understand that technology needs **power** and **care** to work well.

Do this:

1. **Did you use any technology before breakfast today?** Circle: Yes or No
2. **Name one technology tool** you used or saw this morning (e.g. alarm clock, microwave, bus card, phone).

Part 2 – Technology through your day (about 5 minutes)

Technology shows up in different parts of the day. In the **morning**, you might use an alarm, lights, or a kitchen appliance. At **school**, you might use a screen, headphones, or a card to enter the building. In the **evening**, you might watch a show, use a lamp, or charge a device.

Do this: Write **morning**, **school**, or **evening** for when each tool fits best in a typical day.

Technology tool	Morning, school, or evening?
Alarm clock or phone alarm	_____
Classroom screen or projector	_____
Microwave or toaster	_____
Night light or lamp before bed	_____

List one more technology tool you use or see in one part of your day (say which part).

Part of day: _____ · Tool: _____

Part 3 – What technology helps us do (about 5 minutes)

Technology is built to do **jobs** for people. Four common jobs are:

- **Communicate** — share messages, calls, or videos with others.
- **Learn** — find information, practice skills, or follow lessons.
- **Move or find places** — maps, GPS, tickets, or traffic lights that help travel.
- **Stay safe or comfortable** — locks, sensors, thermostats, lights, or medical tools.

Do this: Match each example to one job from the word bank. Write the job word.

Word bank: *Communicate · Learn · Move or find places · Stay safe or comfortable*

Example	Your answer (one word from the word bank)
A tablet shows a math video lesson	_____
A parent sends a text that you are on the way home	_____
A crosswalk button waits for walkers to cross safely	_____
A map app shows the route to a new park	_____

Part 4 – Input and output in everyday tools (about 5 minutes)

Input is what **you** send to a tool: you press a button, turn a dial, type, tap, or speak. **Output** is what the tool sends **back** to you: light, sound, heat, words on a screen, or movement.

Real-life scenario: You press "2 min" on a microwave (input). The microwave beeps and heats your food (output).

Discuss with a partner or reflect in writing: Why does it help to know what you control (input) and what the tool does (output)? What might go wrong if you press the wrong button?

Do this: For each example, write **input** or **output**.

Example	Input or output?
You press the power button on a TV remote	_____
The TV shows your favorite cartoon	_____
You say "play music" to a speaker that listens	_____
The speaker plays a song you hear	_____

Part 5 – When technology needs help (about 5 minutes)

Technology needs **power** (electricity or batteries), **charging** or fresh batteries, **care** (clean screens, gentle hands, no food or drink on devices), and sometimes **updates** from a grown-up. People also follow **rules** so tools last and stay safe.

Scenario: The power goes out at home. Lights, Wi-Fi routers, and many chargers stop working. A battery-powered flashlight still works.

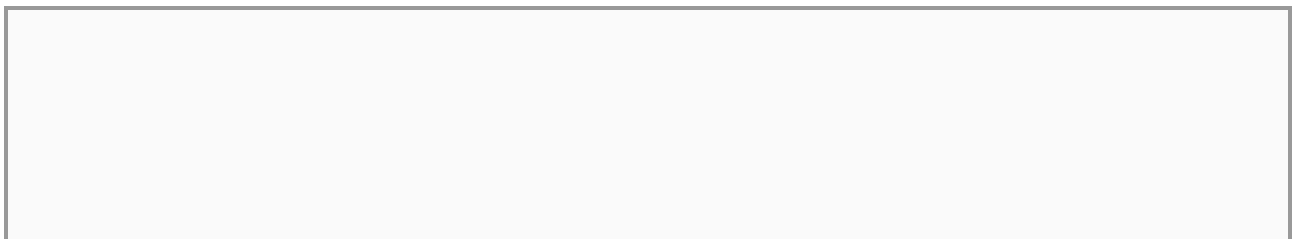

Critical thinking: Name **one thing you can do** to take care of a device or tool at home (e.g. charge when low, wash hands before touching a tablet).

Do this:

1. **Number the steps** 1 to 4 in a good order for using a tablet safely at home (write numbers in the "Order" column).

Step	Order (1–4)
Put the tablet on the charger or in its safe place when finished	_____
Wash or dry your hands; sit in a safe spot	_____
Use the tablet for your allowed activity	_____
Ask a grown-up if you need help opening an app	_____

2. **Draw one technology from your day** in the box below. If you can, label one **input** and one **output** on your drawing.

Part 6 – Check what you learned (about 2 minutes)

Checklist. Put a ✓ in the box when it is true for you.

- ☐ I can explain that technology means tools that help people do jobs.
- ☐ I can name technology in different parts of my day (morning, school, evening).
- ☐ I know four jobs technology can do: communicate, learn, move or find places, stay safe or comfortable.
- ☐ I know the difference between input (what I send) and output (what the tool shows or does).
- ☐ I understand that technology needs power, care, and safe habits to work well.

When all boxes are checked, you have reviewed the main ideas from this worksheet.

Worksheet on Technology in My Day. Central topic: Technology in my day. Main technology area: Everyday technology / How tools work.
