

Benefits of Technology: Social Worksheet

Grade 4 • Worksheet • About 25 minutes

Work with pen and paper. Use color pencils if you like. You do not need a computer or the internet.

Name: _____
Grade/Section: _____
Date: _____

How to use this worksheet

- Do the parts **in order** from top to bottom.
- Each part has a **time** so you know how long to spend.
- Read every instruction before you write. You can do this on your own.

Part 1 – What you will learn (about 3 minutes)

What you will learn: Technology's **benefits** affect **people**—family, friends, classmates, and your community. Using helpful tools in a good way means **sharing fairly**, acting with **kindness**, and keeping **balance** between screens and other parts of life. In this worksheet you will think about who gains from technology, how to share benefits, and how to notice when not everyone has the same access.

Do this:

1. **Name one person** who benefited from technology you used or saw recently.

2. **Write one word** for how you want to act when technology helps a group (e.g. fair, kind, patient).

Part 2 – Sharing benefits fairly (about 5 minutes)

When devices or tools are **shared**, everyone should get a fair chance to enjoy the benefit. Keeping extra time or skipping someone's turn limits what others can learn or do.

Real-life scenario: During research time, one student keeps the class tablet for the whole period because "I am not finished yet." Other students never get to look up their facts.

Discuss with a partner or reflect in writing: How does hogging the tablet limit others' benefit? What is a fair way to share?

Do this: Write **two agreements** your class or family could use when sharing technology.

1.

2.

Part 3 – Benefits that connect people (about 5 minutes)

Some benefits are **social**: they help people feel close, included, or understood. Examples include video calls with family far away, shared documents for group work, and school messages that keep families informed.

Scenario: A grandparent learns to use video calls. Now they can see grandchildren’s faces and hear their voices even when they live in another city.

Critical thinking: Why is **looking at the camera** and **speaking clearly** a social skill—not only a “tech” skill?

Do this: For each situation, write **one social benefit** (how people feel or work together better).

Situation	One social benefit
Classmates edit one document together for a project	_____
A school shares news in a message parents can read	_____
A student calls a sick friend to say “we miss you”	_____

Part 4 – When not everyone has the same access (about 5 minutes)

A benefit is greater when **more people** can use it. Some homes do not have the same devices, internet, or quiet space. Schools and communities can offer **more than one way** to take part so fewer people are left out.

Real-life scenario: A teacher sends a homework notice **only** through an app. One family does not have a smartphone. They miss the notice until the next day. Another class also sends a **paper copy** home—more families get the benefit of knowing on time.

Do this: Circle **Yes** or **No** for each statement. Then write **one sentence** explaining your choice for any one row.

Statement	Yes or No?
Important school news should be shared in more than one way when possible	_____
It is fair to assume every home has unlimited internet	_____
Offering a paper option can help more families get the same benefit	_____

Why (one sentence):

Part 5 – Wise and kind use of helpful tech (about 5 minutes)

Helpful technology does not replace good manners. **Ask permission** before using someone else's device or filming them. Use **kind words** in messages and games. Tell a **trusted adult** if something online feels scary or mean. **Balance** means making time for rest, play outside, reading, and face-to-face talk—not only screens.

Scenario: You are using a helpful learning app. A friend starts filming you without asking. You feel uncomfortable.

Do this: Write **Kind** or **Not kind** for each action.

Action	Kind or Not kind?
Asking before you borrow a classmate's headphones	_____
Filming someone who asked you to stop	_____
Pausing your game when a parent calls your name	_____
Sending a mean message because "it is just online"	_____

Write one rule at home or school that helps you keep **balance** (technology helps, but life is not only screens).

Part 6 – Check what you learned (about 2 minutes)

Checklist. Put a check mark in the box when it is true for you.

- ☐ I can explain that technology's benefits affect **people**, not only machines.
- ☐ I can suggest ways to **share** technology benefits fairly.
- ☐ I can name **social benefits** that connect people.
- ☐ I understand that not everyone has the **same access** to technology.
- ☐ I know how to use helpful tech with **kindness** and **balance**.

When all boxes are checked, you have reviewed the main ideas from this worksheet.
