# Keyboard Basics: Technical Worksheet

**Grade 1 · Worksheet · About 25 minutes**
Work with pen and paper. Use color pencils if you like. You do not need a computer or the internet.

**Name:** _____

**Grade/Section:** _____

**Date:** _____

> **How to use this worksheet**
> - Do the parts **in order** from top to bottom.
> - Each part has a **time** so you know how long to spend.
> - Read every instruction before you write. You can do this on your own.

## Part 1 – What you will learn (about 3 minutes)

**What you will learn:** A **keyboard** is the set of buttons (called **keys**) you press to put letters, numbers, and spaces into a computer or tablet. In this worksheet you will find letter keys, the space bar, and the Enter key, and practice careful pressing.

**Do this:**

1. **Name one place** you have seen a keyboard (school, home, library...).

   _____

2. **Circle** what a keyboard helps you do: Type words · Draw with a crayon · Eat lunch

## Part 2 – What is a keyboard? (about 5 minutes)

A keyboard sits in front of you (or appears on a tablet screen). Each **key** is one button. When you press a key softly, the computer shows a letter, number, or does a small job.

> **Real-life scenario:** Lina sits at the school computer. She sees rows of keys with letters. She presses **A**. The letter A appears on the screen.

**Discuss with a partner or reflect in writing:** Why do keyboards have many keys instead of just one big button?

---

**Do this:** Circle **Yes** or **No**.

| Thing | Keyboard? Circle |
|---|---|
| A board with letter buttons | Yes · No |
| A juice box | Yes · No |
| Keys on a tablet screen | Yes · No |

## Part 3 – Letter keys and the space bar (about 5 minutes)

**Letter keys** type the alphabet. The long **space bar** at the bottom makes a blank space between words so they do not stick together.

> **Real-life scenario:** Omar types his name as “OmarLopez” with no space. His teacher cannot read the two words. He presses the space bar between Omar and Lopez.

**Critical thinking:** What happens to words if you forget the space bar?

---

**Do this:** Circle the matching job.

| Key | Job |
|---|---|
| A, B, C … | Letter · Space · Enter |
| Long bar at the bottom | Letter · Space · Enter |

## Part 4 – Enter and careful fingers (about 5 minutes)

The **Enter** key (sometimes called Return) starts a **new line**, like moving down on a page. Press keys with soft fingers—hard slamming can hurt the keys.

> **Real-life scenario:** Mia finishes one short sentence. She presses Enter. Her next words start on a new line under the first sentence.

**Discuss with a partner or reflect in writing:** When would you want a new line on the screen?

---

**Do this:**

1. **Circle** the safer press: Soft finger · Hard slam
2. **Write one word** you would type with letter keys.

---

## Part 5 – Draw a keyboard tip (about 5 minutes)

**Do this:**

1. **Think of one tip** for using a keyboard (soft press, use space bar, or find Enter).

---

**Do this:** Draw a simple keyboard. Mark the **space bar** or the **Enter** key.

**Write your tip** in a few words under your drawing.

---

## Part 6 – Check what you learned (about 2 minutes)

**Checklist.** Put a ✓ in the box when it is true for you.

□ I know a **keyboard** has many **keys**.

□ I know **letter keys** type the alphabet.

□ I know the **space bar** makes a blank between words.

□ I know **Enter** can start a new line.

□ I know to press keys **softly**.

When all boxes are checked, you have reviewed the main ideas from this worksheet.
