Productivity Systems: Technical Worksheet

Grade 10 · Worksheet · About 25 minutes
Work with pen and paper. Use color pencils if you like. You do not need a computer or the internet.

Name: _____

Grade/Section: _____

Date: _____

> **How to use this worksheet**
> - Do the parts **in order** from top to bottom.
> - Each part has a **time** so you know how long to spend.
> - Read every instruction before you write. You can do this on your own.

Part 1 – What you will learn (about 3 minutes)

What you will learn: A **productivity system** is a repeatable set of tools and rules for capturing tasks, prioritizing, scheduling, and reviewing—so work moves from brain → trusted list → done.

Do this:

1. **Name tools** you already use (calendar, notes, to-do app, paper…).

   _____

2. **Circle** a system trait: Capture + review rhythm · Only sticky notes forever with no review

Part 2 – Capture and clarify (about 5 minutes)

Capture everything that needs action into one inbox. **Clarify** each item: Is it actionable? What's the next physical step? What's done looks like?

> **Real-life scenario:** Jay keeps tasks in chat, email, head, and three apps. Deadlines slip because nothing is complete or reviewed.

Discuss with a partner or reflect in writing: Why does a single capture inbox reduce missed work?

Do this: Turn vague items into next actions.

Item	Next action (write one)
"Science project"	
"Email coach"	
"Study"	

Part 3 – Prioritization frameworks (about 5 minutes)

Simple systems: **Must / Should / Could**, due-date sorting, or Eisenhower-style urgent vs important. Pick one and apply it consistently.

> **Real-life scenario:** Before exams, Lea answers every chat instantly (urgent-feeling) and skips the study guide (important).

Critical thinking: How would an urgent/important split change Lea's evening?

Do this:

1. **List 4 real tasks.** Tag each Must/Should/Could.
2. **Circle** a rule you will try for a week: Morning Must-list of 3 · No prioritization

Part 4 – Review loops (about 5 minutes)

Systems fail without a **review**: daily peek at Must items; weekly clean of inbox and calendar. Tools do not replace the review habit.

> **Real-life scenario:** A fancy app fills with 200 unchecked tasks. Without weekly review it becomes guilt, not guidance.

Discuss with a partner or reflect in writing: What would a 15-minute weekly review include?

Do this: Circle **Yes** or **No**.

Review step	Keep?
Clear inbox to zero or defined lists	Yes · No
Ignore calendar and hope	Yes · No
Move dead tasks to Someday or delete	Yes · No

Part 5 – Design your system map (about 5 minutes)

Do this: Diagram your productivity system: Capture → Lists → Calendar → Review. Name the concrete tools.

Identify one weak link you will fix this week.

Part 6 – Check what you learned (about 2 minutes)

Checklist. Put a ✓ in the box when it is true for you.

☐ I can define a **productivity system**.

☐ I turn vague work into **next actions**.

☐ I can prioritize with a simple framework.

☐ I understand why **reviews** matter.

☐ I can map my personal system.

When all boxes are checked, you have reviewed the main ideas from this worksheet.

Worksheet on Productivity Systems (Technical). Central topic: Productivity systems. Main technology area: Personal knowledge and task systems.
