Shortcuts: Technical Worksheet

Grade 4 · Worksheet · About 25 minutes
Work with pen and paper. Use color pencils if you like. You do not need a computer or the internet.

Name: _____

Grade/Section: _____

Date: _____

> **How to use this worksheet**
> - Do the parts **in order** from top to bottom.
> - Each part has a **time** so you know how long to spend.
> - Read every instruction before you write. You can do this on your own.

Part 1 – What you will learn (about 3 minutes)

What you will learn: A **keyboard shortcut** is a key combination that does a job quickly (for example Ctrl+C to copy). You will name common shortcuts, match them to actions, and practice safe use.

Do this:

1. **Name one action** you do often on a computer (copy, paste, undo, save…).

   _____

2. **Circle** what a shortcut uses: Key combinations · Only the mouse forever · Food wrappers

Part 2 – Modifier keys (about 5 minutes)

Modifier keys (Ctrl, Alt, Shift, and on some computers Cmd) are held while you press another key. Alone they usually do little; together they trigger a command.

> **Real-life scenario:** Maya holds Ctrl and taps C. Her selected sentence is copied. She did not open a menu with the mouse.

Discuss with a partner or reflect in writing: Why might a shortcut be faster than hunting through menus?

Do this: Circle the best match.

Keys	Role
Ctrl or Cmd held with another key	Modifier · Letter only · Mouse
C by itself while typing a story	Modifier · Letter only · Mouse

Part 3 – Common school shortcuts (about 5 minutes)

Useful starters: **Ctrl+C** copy, **Ctrl+V** paste, **Ctrl+X** cut, **Ctrl+Z** undo, **Ctrl+S** save. (On Mac, Cmd often replaces Ctrl.)

> **Real-life scenario:** Luis deletes a paragraph by mistake. He presses Ctrl+Z and the paragraph returns.

Critical thinking: When would Undo be safer than retyping everything?

Word bank: *Copy* · *Paste* · *Cut* · *Undo* · *Save*

Do this: Fill the action from the word bank.

Shortcut idea	Action (from word bank)
Ctrl+C	_____
Ctrl+V	_____
Ctrl+Z	_____
Ctrl+S	_____

Part 4 – Select, then shortcut (about 5 minutes)

Many shortcuts need a **selection** first. Click-drag or Shift+arrow to highlight text, then copy or cut. Shortcuts on empty selection may do nothing useful.

> **Real-life scenario:** Noor presses Ctrl+C with nothing highlighted. Nothing useful copies. She selects a sentence, then Ctrl+C works.

Discuss with a partner or reflect in writing: What should you check before pressing Copy?

Do this:

1. **Write the two-step order:** (1) _____ (2) press the shortcut.

   _____

2. **Circle** the better habit: Select text first · Mash Ctrl+C hoping something happens

Part 5 – Shortcut cheat card (about 5 minutes)

Do this: Draw a small cheat card with at least three shortcuts and what they do.

Star the shortcut you want to practice most and write why.

Part 6 – Check what you learned (about 2 minutes)

Checklist. Put a ✓ in the box when it is true for you.

□ I know a **shortcut** is a key combination for a quick job.

□ I know **modifier keys** work with other keys.

□ I can match common shortcuts (copy, paste, undo, save).

□ I **select** text before many edit shortcuts.

□ I can make a small cheat card.

When all boxes are checked, you have reviewed the main ideas from this worksheet.

Worksheet on Shortcuts (Technical). Central topic: Shortcuts. Main technology area: Keyboard efficiency.
