Click Actions: Technical Worksheet

Grade 2 · Worksheet · About 25 minutes

Work with pen and paper. Use color pencils if you like. You do not need a computer or the internet.

Name: _____

Grade/Section: _____

Date: _____

> **How to use this worksheet**
>
> - Do the parts **in order** from top to bottom.
> - Each part has a **time** so you know how long to spend.
> - Read every instruction before you write. You can do this on your own.

Part 1 – What you will learn (about 3 minutes)

What you will learn: A **click** is a quick press of a mouse button. Different clicks do different things: **single click** selects, **double click** opens, **right click** shows a menu, and **drag** moves things.

Do this:

1. **Write** one thing on a computer you can open with a double click.

   _____

2. **Circle** the click that usually opens a file: Single click · Double click

Part 2 – Types of clicks (about 5 minutes)

A single click **selects** an item. A double click usually **opens** it. A right click opens a small **menu** with choices.

> **Real-life scenario:** Carlos single-clicks a folder and it turns blue. Then he double-clicks and it opens.

Discuss with a partner or reflect in writing: Why do we need different kinds of clicks?

Do this: Match each action with the click. Circle the best click.

Action	Click type
Choose a picture	Single · Double · Right
Open a folder	Single · Double · Right
See a menu to copy	Single · Double · Right

Part 3 – Drag and drop (about 5 minutes)

To **drag**, hold the left button down, move the mouse, then let go to **drop**. You can drag a file into a folder.

> **Real-life scenario:** Ruby drags her homework file into the folder named Homework.

Critical thinking: What can go wrong if you let go of the button too early?

Word bank: *Drag · Drop · Hold*

Do this: Write the step that matches.

Step	Word
Press and keep pressing the button	_____
Move the mouse with the item	_____
Let go of the button	_____

Part 4 – Click practice (on paper) (about 5 minutes)

Practice makes clicks easier. Use slow, gentle clicks. If nothing happens, wait a moment before clicking again.

> **Real-life scenario:** Dan clicks five times quickly and opens five windows by accident.

Discuss with a partner or reflect in writing: What should Dan do instead?

Do this:

1. **Draw** the symbol for a single click (one tap) and a double click (two taps).

2. **Circle** the best habit: Click once, then wait · Click many times fast

Part 5 – My click map (about 5 minutes)

Do this: Draw a mouse. Label the left button, right button, and wheel. Add an arrow showing a drag.

Write what you do when a click does not work.

Part 6 – Check what you learned (about 2 minutes)

Checklist. Put a ✓ in the box when it is true for you.

☐ I know a **single click** selects.

☐ I know a **double click** opens.

☐ I know a **right click** shows a menu.

☐ I can explain **drag and drop**.

☐ I click slowly and gently.

When all boxes are checked, you have reviewed the main ideas from this worksheet.

Worksheet on Click Actions (Technical). Central topic: Clicking and mouse actions. Main technology area: Computers (input devices).
