Navigation: Technical Worksheet

Grade 4 · Worksheet · About 25 minutes

Work with pen and paper. Use color pencils if you like. You do not need a computer or the internet.

Name: _____

Grade/Section: _____

Date: _____

> **How to use this worksheet**
>
> - Do the parts **in order** from top to bottom.
> - Each part has a **time** so you know how long to spend.
> - Read every instruction before you write. You can do this on your own.

Part 1 – What you will learn (about 3 minutes)

What you will learn: Navigation means moving around a computer or website to find what you need. You use **menus**, **folders**, **links**, the **back button**, and **tabs** to get where you want to go.

Do this:

1. **Name** one place on a computer you often navigate to (for example, a folder or a website).

   _____

2. **Circle** the tool that takes you to the previous page: Back button · Print button

Part 2 – Menus, links, and buttons (about 5 minutes)

A **menu** lists choices. A **link** takes you to another page. A **button** performs an action. Knowing the difference helps you navigate faster.

> **Real-life scenario:** Eva wants her science notes. She clicks Documents, then the Science folder.

Discuss with a partner or reflect in writing: Why is it useful to know what each element does?

Do this: Circle the element type.

Description	Element
File, Edit, View at the top	Menu · Link · Button
Underlined text that opens a new page	Menu · Link · Button
A Save icon	Menu · Link · Button

Part 3 – Paths and folders (about 5 minutes)

A **path** shows where a file lives, like Documents > School > Science. Folders inside folders form a tree.

> **Real-life scenario:** Leo says: “My file is in Documents > School > Math > Homework.”

Critical thinking: How does a path help someone else find your file?

Word bank: *Folder* · *Path* · *Back* · *Address bar*

Do this: Write the term that matches.

Description	Term
Shows the route to a file	_____
A container for files	_____
Returns to the previous screen	_____

Part 4 – Getting unlost (about 5 minutes)

If you get lost, use **Back**, **Home**, or search. Browser **tabs** let you keep several pages open, but too many tabs cause confusion.

> **Real-life scenario:** Mia has 14 tabs open and cannot find her homework page.

Discuss with a partner or reflect in writing: What could Mia do to feel less lost?

Do this:

1. **List** two ways to find your way back.

   _____

2. **Circle** the habit that helps navigation: Name files clearly · Leave everything on the desktop

Part 5 – Navigation map (about 5 minutes)

Do this: Draw a simple map of folders: Documents with two subfolders and a file inside.

Write the path to your favorite school file.

Part 6 – Check what you learned (about 2 minutes)

Checklist. Put a ✓ in the box when it is true for you.

☐ I can tell **menus**, **links**, and **buttons** apart.

☐ I know what a **path** is.

☐ I can use **Back**, **Home**, and search.

☐ I know too many tabs can confuse me.

☐ I can read a folder path.

When all boxes are checked, you have reviewed the main ideas from this worksheet.

Worksheet on Navigation (Technical). Central topic: Navigating a computer. Main technology area: Computers (file and screen navigation).
