UI Navigation: Technical Worksheet

Grade 5 · Worksheet · About 25 minutes

Work with pen and paper. Use color pencils if you like. You do not need a computer or the internet.

Name: _____

Grade/Section: _____

Date: _____

> **How to use this worksheet**
>
> - Do the parts **in order** from top to bottom.
> - Each part has a **time** so you know how long to spend.
> - Read every instruction before you write. You can do this on your own.

Part 1 – What you will learn (about 3 minutes)

What you will learn: A **user interface (UI)** is what you see and use on a screen: icons, menus, buttons, and windows. **UI navigation** means moving through these parts to complete tasks.

Do this:

1. **Name** one app you use and one UI element in it (for example, a button).

   _____

2. **Circle** the part of a UI you click to perform an action: Button · Wallpaper

Part 2 – Parts of a UI (about 5 minutes)

Common UI elements are **icons** (small pictures), **menus** (lists of options), **buttons**, **toolbars**, and **windows**. They are designed to be recognizable.

> **Real-life scenario:** In a drawing app, Paula clicks the pencil icon on the toolbar to start drawing.

Discuss with a partner or reflect in writing: Why do icons use pictures instead of words?

Do this: Circle the UI element.

Description	Element
A small picture of a printer	Icon · Menu · Window
A list with Open, Save, Close	Icon · Menu · Window
A box with a title bar that you can move	Icon · Menu · Window

Part 3 – Navigation patterns (about 5 minutes)

Many apps share patterns: a **menu bar** at the top, **tabs** to switch sections, **breadcrumbs** that show where you are, and a **search bar**.

> **Real-life scenario:** On a school portal, Eli sees Home > Grades > Math in the breadcrumbs.

Critical thinking: How do breadcrumbs help you?

Word bank: *Tabs* · *Menu bar* · *Breadcrumbs* · *Search bar*

Do this: Choose the pattern that fits.

Need	Pattern
Switch between sections	_____
Find a topic fast	_____
See where you are	_____

Part 4 – Finding features (about 5 minutes)

If you do not see a feature, check the menu, right-click, or use the **Help** option. Exploring carefully helps you learn a new UI.

> **Real-life scenario:** Zoe cannot find Print. She opens the File menu and sees it.

Discuss with a partner or reflect in writing: What steps would you follow to find a feature?

Do this:

1. **List** three places to look for a feature.

2. **Circle** the best approach: Explore menus step by step · Click everything very fast

Part 5 – UI sketch (about 5 minutes)

Do this: Draw a simple app screen with a menu bar, a toolbar, and a button. Label each part.

Write one UI tip for a new user.

Part 6 – Check what you learned (about 2 minutes)

Checklist. Put a ✓ in the box when it is true for you.

☐ I can name UI parts (icon, menu, toolbar, window).

☐ I know common navigation patterns.

☐ I can use breadcrumbs and search.

☐ I know where to look for hidden features.

☐ I can explore a new UI carefully.

When all boxes are checked, you have reviewed the main ideas from this worksheet.

Worksheet on UI Navigation (Technical). Central topic: Navigating user interfaces. Main technology area: Computers (user interfaces).
